DETAILED ACTION

1. This Office Action is the answer to the communication received on 12/12/2000.
2. Claims 1-35 are pending in this application.

Drawings

3. This application has been filed with 6 sheets of drawings, and they are accepted for examining purposes.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25 are drawn to a computer system coupled to a network to select an imaging workstation (US classification 709/217).
 - II. Claims 26-35 are drawn to a method for utilizing a computer system to configure a workstation, components, and software (US classification 705/26).
5. The above inventions are distinct, each from the other because inventions I, and II contain different inventions as defined by above different US classifications.

The invention of Group I is of such a breadth that it may be directed to any non-specific computer system for any purpose (that computer system does not necessarily build for a purpose of selecting a radiological imaging system).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent

subject matters, (i.e., the search required for Group I may not required for Group II), restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
